

Play By Ear™ Method isn't for everyone, just as traditional music classes. There are instances where certain people just do not have the pre-requisites. In order to do Play By Ear, you need to:

- have enough musical talent. (More on that later....)

- then you must have the WILL/DESIRE/INTEREST to do achieve it.

and, to save time and accelerate your achievements, you need someone knowledgeable, versatile, articulate, musically sound and pedagogically trained (very important!) to teach you so that you can understand the various elements of music quickly (instead of taking many years).

Here, we wish to caution that while many people claim to know the formulas, most of them lack the above qualities to teach them across. A good musician is NOT necessarily a good teacher.

Note the difference and choose carefully. That is why we certify them so that you can have confidence that they can deliver.

When you have understood the principles, then you can apply these principles to construct your favorite songs.
