

Music Learning Made Easy - Is this what Play By Ear™ Method is all about?

Most of the time, it is much easier than the conventional system. However, there may be sections where things get rough and painful (since when has growth been painless?). One of our students, a professor from Middlesex University, aptly put it as: “It is a pleasurable, enjoyable kind of pain!” Because you learn using the ‘experiential method’ – similar to the way you learn to ride a bicycle or learn your mother tongue - it sinks in much more naturally.

Another student: Dr Gita of University Malaya, said that "It is more rewarding than enjoyable" That's because learning does involve stress. Obviously, stress is not exactly an enjoyable thing. However, when you achieve the results, it is a highly rewarding experience.
